DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 11/18/2003 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 3 and 4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to provide an adequate written description of an "olefin-based reformer". It is unclear from the specification what function an olefin-based reformer performs or what are some examples of an olefin-based reformer.
- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/716,888 Page 3

Art Unit: 3727

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, "the polypropylene-based resin and polyethylene-based resin" lack antecedence.

In claim 4, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tanaka et al. '091.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/716,888

Art Unit: 3727

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al. '091.

Tanaka et al. discloses the claimed invention except for the thermally fused film 15 being a polypropylene-based resin and/or polyethylene-based resin with an olefin-based resin including polybutene or polystyrene as a third component. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a polypropylene-based resin and/or polyethylene-based resin with an olefin-based resin including polybutene or polystyrene as a third component for the thermally fused film of Tanaka et al., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Furthermore, Tanaka et al. discloses the claimed invention except for the thermally fused film 15 being a resin comprising an ethylene acetate vinyl copolymer resin, a polyethylene-based resin and an olefin-based reformer. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a resin comprising an ethylene acetate vinyl copolymer resin, a polyethylene-based resin and an olefin-based reformer for the thermally fused film of Tanaka et al., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Art Unit: 3727

10. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al. '091.

Tanaka et al. discloses the claimed invention except for the innermost layer 28 of the bag and at least the thermally fused film 15 being made from EAA, ethylene-metacrylic acid copolymer metallic ion bridging resin or EMAA. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use EAA, ethylene-metacrylic acid copolymer metallic ion bridging resin or EMAA for the innermost layer of the bag and at least the thermally fused film in Tanaka et al., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jes F. Pascua whose telephone number is 571-272-4546. The examiner can normally be reached on Mon.-Thurs..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Newhouse can be reached on 571-272-4544. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
